INTRODUCING OFFICE 365 E1 PLUS

Office 365 E1 Plus provides customers with access to the M365 web productivity customers, plus built-in security controls and management.

These controls extend across user's identities and devices to protect customer organization's sensitive information across emails and files.

How is Office 365 E1 Plus different than Office 365 E1?

Office 365 E1 provides customers enterprise-level web-based productivity and email needs, integrated with cloud services such as OneDrive and SharePoint.

However, Office 365 E1 is limited from a security and compliance feature set. Office 365 E1 Plus addresses this opportunity by bundling Office 365 E1 together with Entra ID P1 (Identity and Conditional Access), Office 365 Data Loss Prevention, and Intune P1 (Endpoint Management).
